**EXAMINER'S AMENDMENT And  
REASONS FOR ALLOWANCE**

1. Claims 1, 3-12, 14-20, 22-29, 31-46, 48-54, 57, 59 and 61 are allowed.

***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Guy R. Gosnell Reg. No. 34,610 on 1/7/2009.

The application has been amended as follows:

- 2.1 Claim 38 line 5 the phrase "capable of" has been deleted.

Claim 38 line 7 the phrase "capable of" has been deleted.

Claim 38 line 10 the phrase "capable of" has been deleted.

***Reasons for Allowance***

3. The following is an examiner's statement of reasons for allowance: While *Baum et al.* teaches automatically generating a subset of components from a plurality of components and *Boose et al.* teaches generating a diagram based upon the automatically selected portions of the connectivity data of only the subset of components without other components from the plurality of components that are not included in the subset of components; and displaying the diagram of only the subset of components without other components from the plurality of components that are not included in the subset of components, **none of these references taken alone or in combination with the prior art of record disclose**, sequentially selecting components into a group of

Art Unit: 2123

components based on connectivity data and using the connectivity data that is generated to identify another component that then can be selected and added to a specific subset of components, specifically including:

(claim 1) “wherein automatically selecting portions of the connectivity data comprises: for an initial component in the subset of components, identifying another component connected to the initial component based upon connectivity data; adding the other component to the subset of components; and repeating the identifying and adding steps with the other component being the initial component”,

(claim 20) “wherein the processing element is configured to automatically select portions of the connectivity data by being configured to: for an initial component in the subset of components, identify another component connected to the initial component based upon the connectivity data; add the other component to the subset of components; and repeat the identification and addition with the other component being the initial component;”,

(claim 38) "wherein the third executable portion is configured to automatically select portions of the connectivity data by being configured to: for an initial component in the subset of components, identify another component connected to the initial component based upon connectivity data; add the other component to the subset of components; and repeat the identification with the other component being the initial component;”, **in combination with the remaining elements and features of the claimed invention.** It is for these reasons in combination with the amendments to the instant claims and arguments presented on pages 14-19 of the 12/17/2008 responses that Applicants' invention defines over the prior art of record.

**3.1** As regards dependent claims 3-12, 14-19, 22-29, 31-37, 39-46, 48-54, 57, 59 and 61 they are allowed for at least the reason that they depend upon an allowed base claim.

Art Unit: 2123

**3.2** Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
